- ## PROJECT 1
  ## SHOPING CART

Online shopping cart website is my first project. This project using python language with help of Django framework. it is online shopping cart website which is used to shopping and read blog to make user better experience of shopping. and user add multiple item in cart and go to the buy option and fill detail and select payment option submit to order is register. User can track the package where the product reach.

- ## PROJECT 2 BLOG

My another project create a Django Blog App . In the blog user read blog article user contact to admin and using log in and sign up to create the account. user signup to create account and login in the app user able to comment in the blog post and reply to any comment
